

CQM1H Programmable Controller

Features

The CQM1H series programmable controller offers advanced flexibility, powerful communication options, and has features traditionally found only in full rack PLC systems. The CQM1H's rack-less modular design allows the user to customize the control system to their own system requirements. Advanced inner-boards, specialized I/O, and communication modules allow flexibility that no other PLC system in this class can offer.

- **4 different base CPUs to choose from with up to 512 points of I/O**
- **Modular design requires no back plane**
- **Inner Boards allow a “customized” configuration of CPU**
- **Serial Communications inner-board supports protocol macros allowing communication with 3rd party devices**
- **Supports all existing and new CQM1 I/O and specialized I/O modules**
- **Optional memory cassettes allow backup of sensitive data and provides real time clock**
- **ControllerLink Module transmits data along Controller Link network at up to 2Mbps (8K word packets) for up to 32 nodes**
- **Advanced instruction set includes PID, Floating point math, Protocol macro instructions and more**
- **Compobus/S and AS-interface master modules support remote I/O**
- **Supported by CX-Programmer V1.2**
- **Up to 15.2 K words of program memory**
- **16 DC inputs built into CPU**
- **UL/CSA/CE**

System Configuration

ControllerLink module allows connection of a CQM1H to a ControllerLink network. Large amounts of data can be transferred easily and flexibly with personal computers as well with other Omron PLCs that support Controller Link.

Inner boards (CPU51 and CPU61 only) allow custom configuration of CPU. Options such as Analog I/O, Pulse I/O, Absolute encoder interface, Serial communications, and Analog setting boards give the user complete control flexibility.

Power supply options are available in 18W or 30W output with input ranges of 100 to 40VAC

4 different base CPUs to choose from. Built in serial port and 16 DC inputs standard on most models

Customize I/O with 8,16, or 32 point I/O modules. Dedicated I/O modules provide analog control, temperature sensor control, and interfacing capability.

Inner Boards

Equipment functions can be upgraded easily with a variety of advanced Inner Boards.

The CQM1H features Inner Boards that allow simple positioning, multi-point high-speed counter inputs, absolute rotary encoder inputs, analog I/O, analog settings, and serial communications for connection to standard serial devices. Select Inner Boards to customize the PLC's capabilities for your applications.

Built-in protocol macro function

Serial Communications Board

Ideal for Simple Positioning and Simple Speed Control

Pulse I/O Board

Read position data directly from an Absolute Encoder.

Absolute Encoder Interface Board

Four analog settings for on-site adjustments, such as timer settings.

Analog Setting Board

Read high-speed pulses of 4 axes at up to 500 kHz.

High-speed Counter Board

Four analog inputs and two analog outputs built into one Board.

Analog I/O Board

Communication

Serial and Peripheral Communication

- Built in RS232C and peripheral port (excludes CPU11)
- Connect directly to Omron programming devices and operator interface terminals
- 1:1 connection to other Omron PLCs allows CPUs to seamlessly share data
- Protocol macro function allows user to create macros for protocols to match communication specifications of an external device allowing data transfers between CPU and devices to be executed with a single PMCR instruction
- Serial communication inner-board supports RS232C, RS422/485, and protocol macro function

Protocol macro function supported by Serial Communications inner-board

Device Level Communication

- Compobus/S master unit enables long distance remote I/O connection with Compobus/S slaves
- DeviceNet slave enables the CQM1H to act as a slave on a DeviceNet network
- AS-Interface master module enables remote I/O connection with ASi slaves

Compobus/S Master allows connection to remote slaves via Compobus/S network

ControllerLink Module

- ControllerLink module can be connected to CQM1H allowing connection to a controller link network via twisted pair wiring
- Data can be exchanged efficiently between PLCs in the network using data links and message communications
- Data and messaging can be transferred between personal computers, CS1, C200H Alpha, CVM1, and CV series controllers
- High speed connection at up to 2 Mbps link
- High capacity data link of up to 32K words per network and 8K words per node
- Connect up to 32 nodes per network
- Supports FINS protocol on ControllerLink as a node in a multi-layer network architecture

ControllerLink Module allows large amounts of high speed data to be exchanged between multiple Omron PLCs or a personal computer via the ControllerLink Network

Input Modules

- 8, 16, or 32 point modules
- AC or DC inputs
- Independent or shared commons
- Screw terminal or I/O connector versions

Output Modules

- 8, 16, or 32 point modules
- Relay contact, transistor, or triac outputs
- Independent or shared commons
- Screw terminal or I/O connector versions

Specialized I/O

<p>● QCM1-SRM21-V1 CompoBus/S Master Unit A high-speed ON/OFF Remote I/O Master Unit that controls up to 128 I/O points. Also supports a long-distance communications mode.</p>	<p>● QCM1-DA021 Analog Output Unit Performs digital-to-analog conversion for two outputs.</p>	<p>● QCM1-SEN01 Sensor Unit Three models of Sensor Modules can be mounted to the Sensor Unit and optical fiber sensors can be connected directly to the QCM1H.</p>
<p>● QCM1-DRT21 CompoBus/D I/O Link Unit Operates as a DeviceNet slave to establish an I/O link of 32 I/O points with a CompoBus/D Master.</p>	<p>● QCM1-IPS01/02 Analog Power Supply Units Required to supply power when using an Analog Input Unit or Analog Output Unit.</p>	<p>● QCM1-TC00□ and QCM1-TC10□ Temperature Control Units One Unit can receive data from two temperature control devices and is ideal for ON/OFF control.</p>
<p>● QCM1-AD041 Analog Input Unit Receives 4 analog voltage or current inputs into the QCM1H.</p>	<p>● QCM1-B7A□□ B7A Interface Units Five Units are available that can connect with B7A Link Terminals.</p>	<p>● QCM1-LSE01/02 Linear Sensor Interface Units Make high-speed and high-precision measurements of voltage or current inputs from linear sensors and convert the measurements to numeric data for comparative decision processing.</p>

For ordering information and other models, see [Ordering Guide section at the rear of this document](#)

SPECIFICATIONS

Item		Specification		
Power Supply Capacity	CQM1-PA203	Supply Voltage: 100-240VAC	Aux. Output: N/A	Capacity: 18W
	CQM1-PA206	Supply Voltage: 100-240VAC	Aux. Output: 5, 24VDC	Capacity: 30W
	CQM1-PD206	Supply Voltage: 24VDC	Aux. Output: 5 VDC (30W)	
Control method		Stored program method		
I.O control method		Cyclic scan with direct output; Immediate refresh processing		
Programming language		Ladder diagram		
Program Capacity		CQM1H-CPU11/21: 3.2K words CQM1H-CPU51: 7.2K words CQM1H-CPU61: 15.2K words		
Data Memory Capacity		CQM1H-CPU11/21: 3K words CQM1H-CPU51: 6K words CQM1H-CPU61: 12K words (DM: 6K words; EM 6K words)		
Instruction length		1 step per instruction, 1 to 4 words per instruction		
Types of instructions		Basic instructions: 14 Special instructions: 148		
Execution time		Basic instructions: .375 to 1.125 µsec Special instructions: 17.7 µsec		
Mounting Structure		No Backplane (Units are joined horizontally using connectors)		
Mounting		Din Track mounting		
Maximum number of modules		11 I/O and Special I/O (12 with CLK module)		
Inner board support		CQM1H-CPU11/21: Not supported CQM1H-CPU51/61: 2 Boards maximum (See CQM1H manual for configuration details)		
Controller Link Unit Support		CQM1H-CPU11/21: None CQM1H-CPU51/61: 1 unit		
Certification		UL/CSA/CE		

Dimensions

	PA203	PA206/PD026	CPU11/21/51/6 1	Modules (all)
Width	53.5 mm (2.11 in)	85.5 mm (3.36 in)	120 mm (4.72 in)	32 mm (1.26 in)
Depth	107 mm (4.21 in)	107 mm (4.21 in)	107 mm (4.21 in)	107 mm (4.21 in)
Height	110 mm (4.33 in)	110 mm (4.33 in)	110 mm (4.33 in)	110 mm (4.33 in)

Calculating Overall PLC width with “n” I/O modules

Power Supply	W (mm)
CQM1-PA203	(32 x n) + 187
CQM1-PA206	(32 x n) + 219
CQM1-PD026	

Note: The total number of I/O modules and specialized modules (n) is limited to 11 Units (12 including the ControllerLink module)

Power Supplies

Description	Rated Voltage	Output Capacity	Auxiliary Supply	Part Number
AC Power Supply	100 to 240VAC	18W	N/A	CQM1-PA203
		30W	24VDC; .5A	CQM1-PA206
DC Power Supply	24VDC	30W	N/A	CQM1-PD026

CPUs

Memory Capacity	I/O Capacity	Built In Inputs	Built In RS232C port	Supports Inner Boards	Supports Controller Link	Part Number
Program: 3.2K words DM area: 3K words	256 points	16 DC Inputs	No	No	No	CQM1H-CPU11
			Yes			CQM1H-CPU21
Program: 7.2K words DM area: 6K words	512 Points			Yes	Yes	CQM1H-CPU51
Program: 15.2K words DM area: 6K words EM area: 6K words						CQM1H-CPU61

Inner Boards

Item	Description	Part Number
High-speed counter board	4 pulse inputs (high speed counter) at 500kHz max 4 external outputs	CQM1H-CTB41
Pulse I/O board	2 Pulse inputs, Single phase 50Khz, Differential phase: 25kHz	CQM1H-PLB21
Absolute encoder Interface board	2 absolute encoder (gray code binary) inputs (4kHz)	CQM1H-ABB21
Analog setting board	4 analog settings	CQM1H-AVB41
Analog I/O board	4 analog inputs: 0 to 5v, 0 to 20mA, -10 to +10V 2 analog outputs: 0 to 20mA, -10 to +10V	CQM1H-MAB42
Serial communications board	One RS-232C port and one RS-422A/485 port	CQM1H-SCB41

Communications Modules

Item	Description	Part Number
ControllerLink Module	Data Link (Maximum number of words per node: 8K) Message communications (SEND/RECV/CMND instructions)	CQM1H-CLK21

Memory Cassettes

Memory	Memory Capacity	Clock Function	Part Number
Flash memory	16K words	No	CQM1H-ME16K
		Yes	CQM1H-ME16R
EEPROM	8K words	No	CQM1-ME08K
		Yes	CQM1-ME08R
	4K words	No	CQM1-ME04K
		Yes	CQM1-ME04R
EPROM memory cassette (Memory chip not included)	Cassette with IC socket Only (EPROM chip sold separately)	No	CQM1-MP08K
		Yes	CQM1-MP08R
EPROM Chip	128 KB (8K words)	N/A	ROM-ID-B
	256 KB (16K words)	N/A	ROM-JD-B
	512 KB (32K words)	N/A	ROM-KD-B

Ordering Guide

I/O and Specialized I/O

Input Modules

Input Type	Number of inputs	Input Voltage	Input Current	Common Type	Connector Type	Part Number	
DC	8	12 to 24Vdc	10mA	Independent	Terminal Block	CQM1-ID212	
	16	12Vdc	6mA	Shared		CQM1-ID111	
		24Vdc				CQM1-ID212	
	32	12Vdc	4mA			Connector	CQM1-ID112
		24Vdc	4mA				CQM1-ID213
		24Vdc	6mA				CQM1-ID214
AC	8	100 to 120VAC	5mA			Terminal Block	CQM1-IA121
		200 to 240VAC	6mA	CQM1-IA221			

Output Modules

Output Type	Number of outputs	Max Switching Voltage	Max Switching Current	Common Type	Connector Type	Part Number
Contact	8	250VAC 24VDC	2 Amps	Independent	Terminal Block	CQM1-OC221
	16			Shared		CQM1-OC222
	8			Independent		CQM1-OC224
Transistor	8	24VDC	2 Amps (NPN)	Shared (Fused)	Terminal Block	CQM1-OD211
	16		.3 Amps (NPN)			CQM1-OD212
	32		.1 Amps (NPN)			Connector
	8		1 Amp (PNP)		Terminal Block	CQM1-OD215
	16		.3 Amps (PNP)		Connector	CQM1-OD214
	32		.5 Amps (PNP)			CQM1-OD216
Triac	8	240VAC	.4 Amps	Shared (Short circuit protected)	Terminal Block	CQM1-OA221
	6					CQM1-OA222

Specialized I/O Modules

Item	Description	Part Number	
CompoBus/S Master	Controls up to 128 remote I/O points via twisted pair	CQM1-SRT21-V1	
CompoBus/D I/O Link	Operates as a DeviceNet slave	CQM1-DRT21	
AS-interface	Operates as a ASi master unit	CQM1-ARM21	
Analog Input unit	4 Analog voltage or current inputs	CQM1-AD041	
Analog Output	2 Analog voltage or current outputs	CQM1-DA021	
Analog Power Supply	Power Supply for Analog modules	One Analog unit supply	CQM1-IPS01
		Two Analog unit supply	CQM1-IPS02
B7A Interface Unit	Connects to B7A link terminals	16 outputs	CQM1-B7A02
		16 inputs	CQM1-B7A12
		32 outputs	CQM1-B7A03
		32 inputs	CQM1-B7A13
		16 inputs/16 outputs	CQM1-B7A21
Sensor unit	Connect up to 4 sensor modules to a single unit		CQM1-SEN01
	Fiber Photoelectric Module	For E32 Series fiber units	E3X-MA11
	Photoelectric Module w/amplifier	For E3C series photoelectric sensors	E3C-MA11
	Proximity module w/amplifier	For E2C series proximity sensors	E2C-MA11
	Dummy module	Spacers for empty modules	E39-MA11
	Remote console	Provides sensitivity adjustment	CQM1-TU001
Temperature control Units	Thermocouple input, transistor (NPN) output, 2 loops		CQM1-TC001
	Thermocouple input, transistor (PNP) output, 2 loops		CQM1-TC002
	Platinum resistance thermometer, transistor (NPN) output, 2 loops		CQM1-TC101
	Platinum resistance thermometer, transistor (PNP) output, 2 loops		CQM1-TC102
Linear sensor interface	Standard		CQM1-LSE01
	With monitor output		CQM1-LSE02

CQM1H Product Overview

Programming Consoles

Item	Description	Part Number
Programming console	2-m connecting cable included (Compatible with C-series PLCs)	CQM1-PRO01-E
Programming console	Requires a separate connecting cable, see below	C200H-PRO27-E
Connecting cable	Cable length: 2m	C200H-CN222
Peripheral port conversion cable	Connects the peripheral port on the CQM1H to a personal computer or Programming console through a CQM1-CIF-CIF01/02 cable	CS1W-CN114

Programming Device Connecting Cables

Item	Description	Part Number
Conversion cable	Converts CQM1H peripheral port to CQM1-CIF01/02 adapter or Programming console	CS1W-CN114
Program download cable	Connects peripheral port to RS232C computer port (Use with CS1W-CN114)	CQM1-CIF02
Connecting cable	Connects peripheral port to D-sub 9pin connector. Must be used with CS1W-CN114 (3.3m)	CQM1-CIF02
Connecting cable	Directly connects Peripheral port to D-sub 9 pin connector (2 m) (No CIF required)	CS1W-CN226
Connecting cable	Directly connects Peripheral port to D-sub 9 pin connector (6 m) (No CIF required)	CS1W-CN626

Peripheral devices

Item	Description	Part Number
Programming console	Handheld programming console with 2m cable attached	CQM1-PRO01-E
Programming console	Handheld programming console with back light (Cable not included)	C200H-PRO27-E
Connecting cable	Connects C200H programming console to peripheral port (2m)	C200H-CN222
Connecting cable	Connects C200H programming console to peripheral port (4m)	C200H-CN422
Conversion cable	Converts CQM1H peripheral port to CQM1-CIF01/02 adapter or Programming console	CS1W-CN114

Software

Item	Description	Part Number
SYSWIN	SYSWIN V3.4 CD ROM	SYSWIN-V3.4
CX Programmer	CX Programmer V1.2	WS02-CXPC1-EV1.2

*CX-programmer, V1.2 available spring 2000, will support New CQM1H functions

Literature

Item	Description	Part Number
Operation Manual	CQM1H CPU and Inner board operation manual	W363-E1-1
Operation Manual	CQM1H Serial Communications Board operation manual	W365-E1-1
Programming Manual	CQM1H programming manual	W364-E1-1
